

User Role- System Event Link Definition (Alt + O)

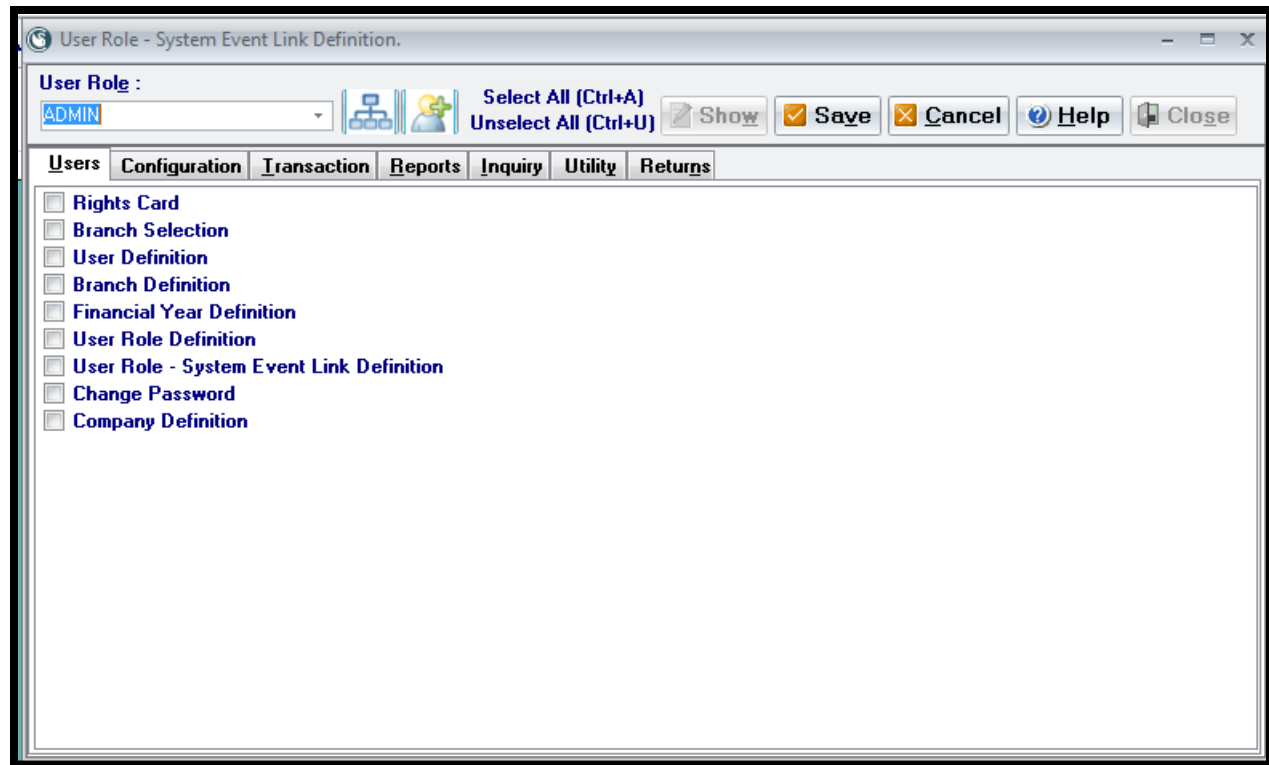

User Role- System Event Link Definition Module enables user to assign rights relating to all the modules.

On clicking the option or on pressing the shortcut (Alt + O), a popup will be displayed to user as shown below:

User needs to select from the drop down the User Role and then click on Show (Alt + H), which will the list of Rights under each module as shown below:

User can select the Rights under different modules to be assigned to different roles by checking the checkboxes against various tabs in different modules.

If the user wants to select all the rights mentioned in the list, then user can click on Select All (Ctrl + A) button and continue such for other modules. Also, user can Unselect All by pressing (Ctrl+ U)

Then User can Click on Save (Alt + V) to save the changes or can Click on Cancel (Alt + C) to cancel the changes.

On clicking the Help (Alt + H) button, user will be redirected to help manual of this Tab. And by clicking Close (Alt+ S) user can close the tab.
